CardConnect Features

Secure All Transactions

Protect every transaction with the best of the best in security technology. CardConnect offers the ultimate data breach protection and PCI scope reduction.

Find the Lowest Rates

Interchange rates are aggressively managed and the technology automatically includes Level 2 and Level 3 data with a transaction so you qualify for the lowest rate possible every time. Save money through consolidation of services. CardConnect is its own gateway so you can eliminate additional third parties (ie Authorize.net, etc).

Integrate with QuickBooks

If you use CardConnect and ServiceCore, we can integrate with QuickBooks so your billing records are kept in a safe and secure place. By using CardConnect you can eliminate those expensive Intuit rates.

Make Payments Easier

Our combined solution covers all payment channels through a single application so you can receive a payment from anywhere at anytime.

Setup Bulk Billing

Bulk billing streamlines your billing process by allowing you to invoice multiple jobs and customers at once. You can save a lot of time on manual invoicing by using this feature.

Click to Pay Emails and Webpage

Add a "Pay Now" button in your email so customers can pay their bills easily online via credit card. Click to Pay also includes a mobile-friendly webpage branded with your logo and contact information, so your customers can pay bills from their tablet or phone.

Set Up Autopay Billing (Coming Soon)

Autopay is the best way to ensure you get paid on time, every time because you can bill all of your customers directly on a regular basis.

Plus...

Combining the only software designed specifically with your industry in mind and CardConnect provides even more great features including:

Quick Integration

PCI-Scope Reduction

One Login for All Your Needs

Next Day Funding
